Since its opening in September of 1960, the University of South Florida has been on the move. USF has been changing constantly to provide an optimal environment for academic excellence. Faculty, staff, administrators and students have been striving to make USF the unique school that it is and to support the motto, "Accent on Learning."
During the past 26 years, many changes have occurred. The population of students, staff and faculty has increased from an enrollment of 2000 to one of greater than 25,000. Activities, interests, and academic pursuits have expanded to meet these needs.
Buildings and facilities have grown and improved. In addition to the main campus, three branch campuses have been constructed in St. Petersburg, Sarasota, and Fort Myers, to carry out the traditions and philosophies on which the University of South Florida was established.
With all this progress, some things have not changed. Many hours are still spent within the classroom and in studying. Extra-curricular activities are available to those who want to participate or just to observe. Students always will enjoy relaxing with friends and taking in the sun and attractions of the Tampa Bay area.
The University of South Florida was conceived and constructed in the 20th Century and is meeting the needs of the 20th Century. A look ahead indicates that USF is still on the move, progressing toward a better future.
The campus appears to be relaxing.

Fine Art students perform in "Ends And Odds".

A student plays with a friendly squirrel.
The university has many unusual features. The splendor of the green surroundings and friendly squirrels attract many visitors. Students here possess a kind of spirit unlike other schools. The equality of the education and emphasis placed on learning is yet another characteristic of the university that is highly publicized. A candid look at USF projects a true feeling of warmth.
Tampa Shows The Good Life

Gayle Sayers interviews famous baseball player for Channel 8 News.
The area surrounding the university is one of Florida’s fastest growing cities. Tampa, and smaller connecting cities, is becoming prominent in business, industry, and tourism. The University of South Florida has been able to capture and participate in some remarkable events. Such political personalities as Governor Bob Graham, Tampa Mayor Bob Martinez, and State Rep. Mary Figg visited the campus this year. WUSF celebrated another year of service to the bay area. New centers were being constructed and opened for cancer treatment and electronic research. Tampa will continue its growth along with USF.
Florida Rocks

Pat Benatar “gets serious” at Lakeland.

The Who takes a final tour.

Mick Jagger and the Rolling Stones stop in Orlando for a concert.

They excite us, arouse us, move us, amuse us. The screaming guitars and battered keyboards cause our hearts to race with electricity. The performers search through the gleaming spotlights to see the waves of faces, while the speakers shake with intensity, sharing the ear-piercing chords. A split second of silence, then the crazed crowd stomps and yells for more. Rock concerts are such a vital part of our life style. They are a source of pure entertainment.

Billy Joel cranks up the Bayfront Crowd.
Cheerleaders highlight an activity in the University gym.

The crowd applauds the Bull Roast.
The drama department presents the play "Ends and Odds".

Every year, the university plans and presents a large number of activities. This year was no exception. Plays such as "Inherit the Wind" and "Ends and Odds" were performed. The traditional Children's Festival also took place. Laughter was the focus at the Bull Roast. The Student Government sponsored a large number of activities for the student body. Activities scattered the calendar throughout the year.

Co-workers assign tickets to parked cars.

Singers enchant the audience at the Bull Roast.
The Camera Focuses On Lifestyles

A group of students gather for a weekend function.

In the classroom, journalism students work on stories.

Studying is often done outside.
The camera focuses on lifestyles surrounding the campus. The pictures show the laughter, the seriousness, and the silence. From the Wednesdays at the Flea Market to the Sundays by the pool, the camera’s eye caught it all. It illustrates all the different sides of the student life. Although there was a time for work, there was also a time for leisure.

A day by the pool to get a suntan is an important activity for some students.
USF Goes To Broadway

The New York skyline illustrates the "Broadway" theme.

Q105 gets involved with students.

Streamers add the final touch to decorations.
Homecoming was a time of festivities, spirit, and partying. This year, USF put on top hats following the theme, "On Broadway". Decorated cars and floats paraded around the campus with students watching and participating. The Student Government planned activities throughout the entire week. It was a time when faculty, administration, and student body became one to celebrate the days "On Broadway".
ORGANIZATIONS
Student organizations provide the backbone of University social life. They create an outlet for social service and involvement within the University and the Tampa Bay community. There are over 200 different organizations formed to meet the wide variety of interests at USF. Included in these organizations are those which are oriented to academic majors, departments, and colleges; groups which provide programs, information, and governmental experience; and, association of students with a common interest in specific ideological, recreational and technical areas of special concern.

President Brown

The prestigious position of president of a state university requires a great deal of time and dedication. President John Lott Brown fulfills these demands on a continual basis. Meetings and speeches are only a part of the job as well as the annual graduation ceremonies and honor programs. President Brown, a psychologist and visual scientist, came to USF as its third president in 1978. To continue to improve USF's high quality of education, President Brown is aided by a battery of staff members.
Vice Presidents

TOP LEFT Albert C. Hartley, Vice President for Administration & Finance. CENTER LEFT Steven G. Wenzel, Vice President for Employee Relations & Legal Affairs. BOTTOM LEFT Daniel R. Walbot, Vice President for Student Affairs. TOP RIGHT Gregory M. O’Brien, Vice President for Academic Affairs. BOTTOM RIGHT Joseph F. Busta, Vice President for University Relations.
The College of Arts and Letters in the Russell Cooper Building provides studies in culture in the broadest meaning of the word. The college offers students a sense of themselves and their world through courses and programs involving human expression and communication. The college is made up of eight departments: American Studies, Communication, English, Foreign Languages, Humanities, Mass Communications, Philosophy, and Religious Studies. Foreign language groups, the ORACLE, the 20th Century Yearbook, and a language lab are housed within the college. There are eighteen fields to choose from to obtain a bachelor's degree. The dean of the College is James Strange.
College of Business Administration

Chester H. Ferguson Hall with its unusual construction is home of the College of Business Administration. The building is mostly underground and has proven to be energy efficient. The college concentrates in the areas of Accounting, Economics, Finance, Management, Marketing, and General Business. Professional and honorary societies within the College enable the student to develop both professionally and socially. Dean of the College is Robert G. Cox.
College of Education

The College of Education places emphasis on students learning what is relevant for the world today and on getting deeply involved in their own educational process. Numerous educational societies and associations exist within the college for the student to join. On Saturdays, classes for exceptional students are taught by USF students. The annual Children’s Fair sponsored by the college provides an enjoyable weekend for both the students and children of the community. The college offers 25 fields from which to choose a degree. Dean of the College is William Katzenmeyer.
College of Engineering

With the future of technological and societal developments ever present, the College of Engineering stresses a strong engineering foundation designed to equip the prospective engineer with a broad base of fundamentals. The College emphasizes three aspects of engineering: Activity, design, research, and the operation of complex technological systems. Engineering Expo, an annual event, opens the college to the public through many displays and exhibitions. The College is composed of four departments which offer eight degree programs. Dean of the College is Glenn A. Burdick.
College of Fine Arts

The College of Fine Arts provides programs of study, theatres of practice, and programs of events for the university and the surrounding communities. The college offers the students an opportunity to enrich and enhance their creative talents. A broad selection of courses and degree programs are found within the departments of Art, Dance, Music and Theatre. Many students became involved in the Fine Arts Events program which features a variety of local talent, offers exhibitions and shows films. Faculty and student productions are performed each semester for the public. August L. Freundlich is dean of the College.
College of Medicine

Integrity, character, motivation, dedication, and general fitness are some of the qualities required of medical students. Before obtaining entrance into the College of Medicine, a student must take a minimum of three years of college and pass the Medical College Admission Test. The medical students continuously strive to upgrade the health care standards in the community and to become an integral part of university life. Relevance to medicine is emphasized on all areas of instruction in a way recognizable and understandable to the student. The curriculum provides a close and on-going experience for the student in the day-to-day health care delivery system. Andor Szentivanyi is dean of the college.
College of Natural Sciences

Students in the College of Natural Sciences are trained in methods of logical analysis and the modes of experimentation in a continuing attempt to better understand the nature of man and his relationship to the universe. The college offers programs in Biology, Microbiology, Botany, Zoology, Chemistry, Biochemistry, Geology, Marine Science, Mathematics, Medical Technology, and Physics. The programs are designed for students planning scientific careers in these fields or for those planning professional careers involving the components of science. The college has a planetarium, a botanical garden, and a comstar satellite. Dean of the College in 1983 was James D. Ray, Jr.
The College of Nursing is committed to the improvement of nursing and health care services through educational programs, community service and research activities. The program provides two curricula, one for generic students and another for registered nurses who are graduates of diploma or associate degree nursing programs. The practice of professional nursing involves problem solving and decision making based on knowledge from the humanities, natural and behavioral sciences. Dean of the College is Gwendoline R. MacDonald.
College of Social & Behavioral Sciences

The social and behavioral sciences are concerned with human beings and their development, problems, behavior and institutions. The study of man helps the student to understand the world of which he is part, to become a more informed citizen and to prepare for a role in society. The college offers fifteen fields of study and students also have the opportunity to react and interact with people through the various organizations and honor societies of the college. Wallace A. Russell is dean.
From the Gwynne Institute Building to the new campus on the 55-acre site next to Edison Community College, USF at Fort Myers has come a long way. The new campus will share facilities with ECC. This regional campus previously offered only upper level courses in Business Administration, Education, Nursing, and Social Sciences, as well as graduate programs in Business and Education. Lower level classes are being added to the curriculum making it possible for a student to complete all undergraduate requirements for USF on the campus. Linda Lopez McAlister is the campus dean.
Sarasota

USF at Sarasota is located on a 100-acre tract which includes the former waterfront estate of Charles Ringling. The Ringling Mansion now houses the campus library. US 41 bisects the area into the East Campus and the Palmer Campus. On the East Campus is the Hamilton Student Center which serves as the hub of activity for students and others in the campus community, day or night. Upper division course work is available in Education, Engineering, Natural Sciences, Business, Social Sciences and Nursing for a bachelor's degree. Several masters programs are also offered. The campus dean is Robert V. Barylski.
Established in 1968 and originally housed in a former Merchant Marine training facility, St. Petersburg is the oldest regional campus of USF and is undergoing extensive expansion and new construction. A new library, an academic instruction and administration center, and a utilities building were recently opened. USF at St. Petersburg offers upper level courses and baccalaureate programs in a broad variety of areas including Business, Education, Social Sciences and Liberal Arts. Master programs are also offered in Business and Education. John Hinz is dean of the St. Petersburg Campus.
University of South Florida Alma Mater

Hail to thee, our Alma Mater
May they name be told,
Where above the gleaming splendor,
Waves the green and gold
Thou our guide in quest for knowledge
Where all men are free;
University of South Florida,
Alma Mater, Hail to thee.

Be our guide to truth and wisdom
As we onward go,
May thy glory, fame and honor
Never cease to grow.
May our thoughts and prayers be with thee
Through eternity;
University of South Florida
Alma Mater, Hail to thee.

Graduation
1982-1983 Bulls
The 1982-1983 Bulls ended their season with a record of 22-10. They had an impressive year, winning the Florida Four Tournament for the second year. The Bulls also gained national recognition by receiving a bid to the National Invitational Tournament. The team met the Fordham Rams but were unsuccessful. Coach Lee Rose feels they have come a long way, but there is still a way to go. However, if there is a continuation of the support that was shown this year, the Bulls will surely give the fans something to be happy about.
Basketbulls
Baseball

Youth and a mixture of new and experienced players was what Coach Robin Roberts had to work with for the 1982-1983 baseball season. The Bulls started off their season with a lot of challenges but ended with a record of 19-32.
Women's Basketball

Women's basketball was off to a great start at the beginning of the season at 7-3. Then the bottom fell out as the women entered an almost non-stop losing streak which plagued them for the remainder of their 9-16 season. However, hope still remains bright for next year's team.
The softball team's outstanding 52-15 season was capped by winning the university's first national championship at the American Softball Association Tournament. The Brahmans recorded a 4-3 extra-inning victory over rival Florida State for the national championship.

The team also won the University of West Florida Invitational after almost being forced out of the competition by losing to the host team.
Match after match, set after set, game after game, the men’s tennis team won victory after victory. The impressive display of talent, energy, and strategy led the team to an 18-8 season and the Sun Belt Conference where it took second place.

The women’s team began on a poor note ending the first half of the season with a 3-10 record. Slightly brighter skies were in store for the second half of the season and the team ended the year with a 13-13 record.
Volleyball

The 1982-1983 Brahman Volleyball team started on a slow pace, but made a strong comeback by the middle of the season to even its record at 10-10. Head Coach Hildred Deese commented that the team had a lot of problems during the year including injuries. The Brahmans have high hope for a better season next year.
Members of the cross country team placed second at the Florida State tri-meet and the Florida Junior College Invitational as they continued the same excellent performances posted in the past five years of the team's existence.
At 10-4-1, the soccer team again had a winning season despite tactical errors and mental mistakes that hindered the team's efforts and kept it from playing at the full extent of its capabilities.

The team began the season with an impressive nine-game winning streak, knocking over such teams as Miami, Flagler, and Rollins.

The team made it to the opening round of the NCAA playoffs where it was defeated by Duke University.
Swimming

The swimming team was in top form as the men and women placed high on an individual as well as a team basis. In the first meet of the season, fourteen members of the women's team and two women's relay teams qualified for nationals.
Golf

The men's golf team continued to defend its Sun Belt Conference title while the women's team racked up honors by placing second at the Lady Tar Heel Invitational and the Memphis State Invitational and first at the Peggy Kirk Bell Invitational from which it went into the state championship.

The women's team also captured second at the Lady Aztec Invitational which put them as the seventh ranked team in the nation.
Cheerleaders Provide Spirit
